

1. 问题不会怎么办？

情形 1：当没听清或没听懂老师的问题时：

Sorry, I didn't catch the question. Could you repeat it in another way? (麻烦老师解释题)

I'm sorry, I didn't hear that clearly, May I ask you to repeat it, please? (对不起，我没听清楚，您可否重复一遍呢？)

如果只是其中某个单词不确定意思，可以这样问：

Sorry, I didn't understand the word+某个单词, could you explain it, please?

情形 2：解释了还是不会：

Sorry, I'm not sure about how to answer it but I guess +关键词相关内容。

I'm sorry, but I don't know much about...

情形 3：当老师没有理解或误解你的回答时：

Sorry, maybe you are mistaken. Can you give me a chance to explain? (老师误解时)

情形 4：当得到老师的肯定时，要表示感谢：

Thank you for your encouragement, I will go further to enrich my knowledge.

2. 自我认知类话题

2.1 兴趣/如何处理生活压力

[问题] Do you have any hobbies that you are proud of? What's your favorite hobby?
Describe one of your hobbies

[关键词] hobby (interest)

回答模板：

1. I enjoy sports, such as running and swimming. Sometimes I also do push-ups. I think doing some exercise once in a while can relax me and help me complete tasks with greater efficiency.

我喜欢运动，比如跑步和游泳，有时候我也会做俯卧撑。我觉得偶尔做一些运动可以缓解压力，让我能以更高的效率完成任务。

2.2 特长

[问题] What are your personal strengths?

[关键词] personal strengths

回答模板:

2. I'm good at writing. I think writing can enhance my logical thinking. Additionally, writing is a process of reflection that can deepen and broaden my mind.

我比较擅长写作。我觉得写作可以增强我的逻辑能力。另外，写作是一个思考的过程，可以增加思想的深度和广度

2.3 优点、为什么把offer发给你、说三个录取你的理由

[问题] What do you think about your strengths?

What is your greatest strength?

Do you have any particular merits?

[关键词] strength;merits

4. I have self-learning abilities. In competitions, I often encounter new knowledge that I need to understand and apply within a very short time. During this process, I frequently search for online courses and materials, and I have developed the ability to learn quickly.

In addition, I have strong hands-on abilities, which enable me to quickly validate new ideas. I also have a strong ability to handle pressure. I won't be discouraged by challenges.

我的自学能力比较强。在竞赛中经常接触到一些新知识，并且需要我在极短的时间内理解并应用这些知识。在这个过程中，我经常需要查找网课与资料，并培养了快速学习的能力。另外，我的动手能力比较强，可以快速验证一个想法。我的抗压能力比较强，不会被科研中的困难打败

2.4 缺点

[问题] What do you think about your weakness?

What is your greatest shortcoming?

[关键词] weakness;shortcoming

3. I don't usually participate in social activities. However, I have used the time that others spend on socializing to learn a lot of useful knowledge, like machine learning. Of course, communication with others is important in future work and studies, so I am also learning to talk to people more.

我平时不怎么参加社交活动。不过我也用别人去社交的时间学习了很多有用的知识，比如机器学习。当然，与人沟通是未来工作和学习中必不可少的，所以我也会学着去主动与人交谈

2.5 家乡、最喜欢的城市

[问题] Where are you from?

Tell us something about your hometown

Would you like to tell us some stories about your hometown?

[关键词] where are you from;hometown

回答模板:

1. I come from XXX, Zhejiang Province. The business people here are daring and enterprising, with many of them going out to do business in other provinces or even abroad. The city is also home to various food, such as XXXXX and XXXXX.

我来自XXX。这里的商人敢闯敢拼，有很多人去了省外甚至国外做生意。这里也有很多美食，比如XXX、XXX

2.6 家庭

[问题] Could you tell me something about your family?

[关键词] family

回答模板:

1. My family has four members—my parents, my younger sister, and myself. My mom works as a XXXXX, and my dad is a XXX. At home, my parents always show respect for my interests. I think this kind of family environment plays a significant role in developing my creativity.

我们家一共四口人，我的父母，我，还有我的妹妹。我的妈妈是XXX，我的爸爸是XXX。在家庭中，我的要求和兴趣会得到父母充分的尊重。我觉得这种家庭氛围培养了我的创造性

3. 社科实践类话题

3.1 实习经历（考研用）

[问题] Please introduce your internship briefly.

What have you learned from your internship experience?

[关键词] internship

1. I'm sorry, professor, but I don't have any internship experience. However, I have participated in several competitions related to artificial intelligence, through which I learned a lot about computer vision and machine learning. These experiences have also helped me apply knowledge to practice. I believe they can make up for my lack of internship experience.

很抱歉老师，我没有实习经历。但是我参加了一些人工智能与机器人相关的比赛，学到了很多计算机视觉与机器学习的知识。这些经历同样能帮助我将学到的理论运用到实践中。我觉得这些经验可以弥补没有实习经历的不足

3.2 科研经历（项目1）（你承担哪项工作投入的经历最多？）

[问题] Could you say something about your experience of scientific research?

[关键词] scientific research

As the leader on a XXX project, to address data scarcity, I XXXXXXXXXX.

3.3 竞赛经历（项目2）（你是否主动发起过某个项目或活动？）

In the XXX competition, I used a dual-branch network. One branch XXXXX; the other XXXX, achieving an accuracy of 0.99.

3.4 竞赛经历（项目3）

In the XXX competition, I served as a core member, focusing on visual recognition. To handle interference, we XXX, and we finished all tasks perfectly.

4. 本科学习类话题

4.1 专业书籍

[问题] What professional books have you read before? What's the main idea of this text?

[关键词] professional books; main idea

During my studies, I took a course called "Pattern Recognition and Machine Learning." In addition to the textbook, I also read a book titled Pattern Recognition outside of class. Both the two books are about machine learning. However, while the textbook focuses more on concepts, this book provides many case studies and code examples, which helped me deepen my understanding.

我本科期间有一门专业课叫《模式识别与机器学习》。除了课本，我在课外还读了一本叫《模式识别》的书。它与课本讲的都是常见的机器学习算法。课本更注重概念解释，而这本书有很多案例与代码，可以帮我加深对课本的理解

4.2 本科学校

[问题] Could you tell us something about your university?

[关键词] university

I did my undergraduate studies at XXX. Although my university may not be among the best universities, I am still grateful to it. During my college years, I studied diligently and received some scholarships. I also joined the robotics club, where I learned a lot about robotics and machine learning. In addition, there are many scenic spots around the school, such as XXX, which left a deep impression on me.

我本科就读于XXX。虽然我的母校不算很强，但我还是很感激它，因为它给了我一个提升自己的机会。在大学期间，我刻苦学习，多次获得奖学金，另外也加入了学校的机器人社团，学到了很多机器人与机器学习的知识。另外，学校周围有很多经典，比如XXX和XXX，这让我印象深刻。

ADD 大学生活中你最喜欢哪一方面/生活中比较难忘的记忆

During my college years, I studied diligently and received some scholarships. I also joined the robotics club, where I learned a lot about robotics and machine learning. In the XXX competition, I served as a core member, focusing on visual recognition. To handle interference, we XXXXX, and we finished tasks perfectly.

4.3 专业课程

[问题] What is your favorite subject and why?

[关键词] favorite subject

My favorite course is Pattern Recognition. The instructor for this course is very dedicated to us and often introduces some extracurricular knowledge beyond the textbook. The course primarily focuses on traditional machine learning, and later also covers some topics in computer vision, which are relevant to my projects and have greatly sparked my interest in learning.

我最喜欢的课程是模式识别。这门课的老师对我们很负责，经常讲一些课外的知识。这门课主要是关于传统机器学习，后面也涉及了一些计算机视觉的知识，跟我做的项目比较相关，激发了我的学习兴趣。

4.4 本科荣誉/你的大学收获/大学是怎么度过的

[问题] Have you ever won any prizes at university?

Did you get any honors and awards at college?

[关键词] prizes; honors and awards

[回答思路]本科获得的荣誉能够帮助老师判断你在本科学习、生活、竞赛、考证等过程中的表现，回答这一问题时可以参考以下思路：（1）点明本科所获荣誉：（2）为之付出的努力：（3）今后的打算。没有获得过荣誉也没有关系，如实告知老师，并通过转折说说自己在科研、实习、毕业设计过程中的收获或者未来的努力方向。

I have received honors such as the National Scholarship and the university's Outstanding Student award. I put a great deal of effort into achieving these, like completing assignments carefully and doing proper preview work. In addition, I participated in many competitions, such as the China Robot Competition. These competitions were very helpful in the evaluation process. I will continue to work hard and achieve better results.

我在本科期间获得过国家奖学金、校优秀学生等荣誉。我为此付出了很多努力，包括认真上课并完成作业，做好预习工作。另外，我还参加了很多比赛，比如中国机器人大赛。这些比赛在评比中起到了很大帮助。我会继续努力取得更好的成就。

4.5 毕业论文（考研用）

[问题] Please talk about the design process of your graduation thesis.

Please introduce your graduation thesis.

[关键词] graduation thesis; design process

1. I'm sorry, professor, but our school only requires us to write our graduation thesis in the fourth year. However, I have already made a simple plan for my thesis, with the direction being related to computer vision. If given the opportunity, I hope to complete my graduation project in collaboration with your university.

很抱歉老师，我们学校在大四才要求写毕业论文。但是我对自己的论文做了一个初步设想，方向是计算机视觉相关，如果有机会的话希望可以跟贵校完成我的毕业设计

5. 保研动机类话题

5.1 选择自动化专业的原因、为什么选CV方向、为什么读研

[问题] Why do you choose this major?

[关键词] choose this major

I have always been interested in this major. Currently, there is a growing demand for computer vision and intelligent robots, and I'm optimistic about the future of automation. Through my projects, I have gained knowledge in computer vision. However, my research abilities still need improvement, and I sometimes feel confused when faced with complex problems. Therefore, I hope to further my education.

我一直对这个专业非常感兴趣。现在对计算机视觉与智能机器人的需求越来越大，我很看好自动化的发展前景。在项目中，我学习了计算机视觉的知识，但我的科研能力还有欠缺，面对复杂问题还是有些无力，希望能继续读研深造

5.2 跨专业的原因（生医工、医学图像）

[问题] Why do you change your major?

[关键词] change your major

I have a strong interest in medical imaging, even though my major is automation. The automation major focuses more on robot control, and its coverage of computer vision is relatively limited compared to other majors. Medical imaging is a specific application of computer vision in healthcare. I believe this is a great direction for improving people's health.

我对医学图像有较大的兴趣，即使我的专业是自动化。自动化更关注机器人的控制，在计算机视觉层面的工作相对其他专业有所不足。医学图像是计算机视觉在医疗领域的具体应用，我觉得这是一个提高人们身体健康水平的好方向

5.3 选择某学校的原因、对我们学校的印象

[问题] Why do you choose to study at our school/institute?

[关键词] choose to study at our school/institute

I believe that the university has strong academic strengths, with lots of computing resources and plenty of opportunities to engage with real-world problems. In addition, there are many excellent faculty members and a vibrant research atmosphere. Also, I think the university's location and scenery are very nice.

我觉得贵校的学术实力非常强，不仅有充足的算力支持，还有大量接触现实问题的机会。同时，这里汇聚了许多优秀的老师，学术氛围浓厚。我觉得学校的位置和风景也很不错

6. 未来规划类话题

6.1 毕业后规划

[问题] What will you do after graduation?

[关键词] What will you do; after graduation

1. After graduation, if possible, I hope to continue pursuing a doctoral degree. If my research abilities are not enough for doctoral studies, I would like to join a research institute to work in related fields, such as the application of computer vision.

毕业后，如果有机会的话，我希望能继续攻读博士学位。如果我的科研能力尚不足以读博，我希望能进入研究所从事视觉相关的工作，比如CV算法的应用

6.2 研究方向

[问题] Which research direction do you like and why?

[关键词] research direction

I have chosen computer vision as my research direction. I find this field very meaningful, as it is a key branch of artificial intelligence and aligns with the trend of intelligent systems. Secondly, the projects I worked on are relevant to this direction. I'm confident that I can do well in this field.

我选择计算机视觉作为研究方向。我觉得这个方向很有意义，是人工智能的重要分支，符合智能化发展的趋势。其次，我本科做的项目和这个方向比较相关。我有信心把这个方向做好（本专业，模式识别/计算机视觉）

I have chosen medical imaging as my research direction. I find this field very meaningful, as it represents the application of AI in the healthcare and aligns with the trend of smart healthcare. Secondly, the projects I worked on are relevant to this direction. I'm confident that I can do well in this field.

我选择医学图像作为研究方向。我觉得这个方向很有意义，是人工智能技术在医疗领域的应用，符合智能医疗的趋势。其次，我本科做的项目和这个方向比较相关。我有信心把这个方向做好（跨专业，医学图像/生医工）

6.3 研究生学习规划

[问题] Can you talk about your plans for postgraduate study?

What do you expect to achieve during your studies if you are enrolled in this institute?

[关键词] plans; postgraduate study; expect to achieve; enrolled

In the first year, I will devote myself to reading the papers recommended by my teacher, and mastering commonly used models such as ViT. In the second year, I will actively participate in my supervisor's research projects, and begin to write my own papers. In the third year, I will try to publish high-level papers, and if possible, I will apply for a doctoral degree. In short, I'm looking forward to enhancing my research abilities as much as possible.

第一年，全力以赴阅读导师推荐的论文，掌握ViT等常用算法。第二年，积极参与导师的科研工作，并尝试撰写自己的论文。第三年，尝试冲击高水平论文，如果可能的话，申请博士学位。总而言之，我希望能尽可能的提高我的科研水平（硕士）

In the first year, I will devote myself to reading the papers recommended by my teacher, and mastering commonly used models such as ViT. Later, I will actively participate in my supervisor's research projects, and begin to write my own papers. Then, I will try to publish high-level papers, and if possible, I will stay here to work as a postdoctoral fellow. In short, I'm looking forward to enhancing my research abilities as much as possible.

第一年，我将全力以赴阅读导师推荐的论文，掌握ViT等常用算法。然后，积极参与导师的科研工作，尝试撰写自己的论文。接下来，尝试冲击高水平论文，如果可能的话，我会留校担任博士后。总而言之，我希望能尽可能提高我的科研水平（直博）

ADD是否打算读博

I'm willing to pursue a doctoral degree, and my family respects my choice. But I haven't published any papers yet, and I'm worried that my research abilities may not be enough. If my advisor later recognizes my research abilities, I will apply for the doctoral degree.

我愿意读博，我的家人也尊重我的选择。但是我没有发过论文，我担心我的科研能力跟不上。后面老师觉得我的科研能力足够的话，我会申请博士学位

7. 自我介绍

Dear professors, it's my honor to be here.

I'm XXX from XXX University, and my major is Automation. I currently rank XXX in my major.

My research focuses on computer vision. As the leader on a XXX project, to address data scarcity, I XXXX. For XXXX, I XXXX, reaching an F1 of 0.98.

In the XXX competition, I used a dual-branch network. One branch XXX; the other XXX, achieving an accuracy of 0.99.

In the future, I am eager to explore how AI can solve problems in computer vision. I'm looking forward to enhancing my research abilities as much as possible. Thank you for your time. （快速60秒，慢速90秒）

Dear professors, it's my honor to be here.

I'm XXX from XXX University, and my major is Automation. I currently rank XXX in my major. Additionally, I have also received the National Scholarship and earned more than ten prizes in robotics and AI competitions.

My research focuses on computer vision and intelligent systems. As the leader on a XXX project, to address data scarcity, I XXXX. For XXX, I XXXXX, reaching an F1 of 0.98. This project resulted in XXXXX.

In the XXX competition, I used a dual-branch network. XXXXXX, achieving an accuracy of 0.99. We ultimately ranked second globally, with the same accuracy as the champion.

In the XXX competition, I served as a core member, focusing on visual recognition. To handle interference, we XXXXXXXXXX. We ultimately achieved first prize, ranking third place overall.

In the future, I am eager to explore how AI can solve problems in computer vision and robotics. I'm looking forward to enhancing my research abilities as much as possible. That's all. Thank you for your time. （慢速3分钟）

ADD1研究生是否报了其他学校？

Previously, I contacted a professor at XXX. However, their researches place greater emphasis on sensors, and my projects focus more on computer vision. In comparison, your research group aligns more closely with my interests.

之前我联系了XXX大学的一个老师，但是他们更侧重于传感器，我的项目比较侧重计算机视觉算法，相比之下咱们课题组跟我的方向更对口一点。

I previously applied to XXX University, but that institute focuses on remote sensing, while my projects focus more on general computer vision. In comparison, your research group aligns more closely with my interests.

我之前报了XXX大学，但是那个学院以遥感图像为主，我的项目比较侧重通用的计算机视觉算法，相比之下咱们课题组跟我的方向更对口一点。

ADD2本科对你影响最大的老师、你最喜欢的老师

Professor XXX, who taught the Pattern Recognition course. She is very dedicated to us and often introduces some extracurricular knowledge beyond the textbook. In addition, since my project focuses on computer vision, and her research direction is also computer vision, it greatly stimulated my interest in this field.

对我影响最大的老师是模式识别课程的XXX老师。她对我们很负责，而且经常向我们介绍一些课外的知识。另外，因为我的项目聚焦计算机视觉，而她的研究方向也是计算机视觉，这激发了我的学习兴趣

ADD3你遇到的最大的困难与解决方法/项目的创新点

XXXXXXXXXXXXXX

ADD4你对选择导师的标准

My research focuses on computer vision. Therefore, I hope to work with a supervisor in the field of artificial intelligence. I also hope to develop a great relationship with my supervisor, which is both professional and friendly. I will actively communicate with my supervisor to improve my research abilities.

我的研究集中在计算机视觉领域。因此，我希望能与人工智能方向的导师合作。我也希望能与导师建立一种既专业又友好的良好关系。我会积极与导师交流，以提升自己的科研能力

ADD5用三个词概况你自己

Curious, Persistent, and cooperative. I stayed curious by exploring competitions and projects. I remained persistent through failures and model tuning. I valued cooperation, which shaped my growth most meaningfully.

好奇、坚韧、协作。我通过参与竞赛和科研保持好奇心；多次失败和调参中坚持下来；重视团队合作，这最有意地塑造了我的成长。

ADD6什么工作会被AI取代、你对AI的看法

AI now performs at near-human levels in tasks like programming and writing. When humans guide AI, results are generally good; when AI directs humans, outcomes often become extreme. In the future, AI will replace some unskilled labor but will not replace mental work. Instead, it will serve as a tool to boost efficiency.

目前AI在编程、写作等方面都接近人类水平。在一个工作中，如果是人在指挥AI完成目标，那往往能得到好的结果。如果完全让AI指挥人类去工作，结果往往比较极端。在未来，AI会取代简单的体力劳动，但无法取代脑力劳动，而是作为提高效率的工具

ADD7解释一下XXX的原理

Transformer的原理：

The Transformer uses self-attention to weigh the importance of all input tokens, capturing long-range dependencies. It employs multi-head attention, positional encoding to preserve sequence order, and feedforward layers.

CNN的原理：

CNN extracts image features through convolutional filters, applies pooling to reduce size, and uses fully connected layers for classification.

ADD8谈一谈你的一段旅行经历

I have been to Shenzhen before. It is a modern and lively city. I visited Window of the World and saw many beautiful views. There is a lot of delicious food here, such as roast duck rice. I really enjoyed my time there.

我之前去过深圳旅游，那是一个现代化的、有活力的城市。我参观了世界之窗，看到了很多美丽的风景。这里有很多好吃的食物，比如烧鸭饭。我很享受在那里的时光

ADD9简历中哪段经历最能代表你，为什么？哪段经历为你的研究生学习做了最充分的准备？

In the XXX competition, the model struggled to XXXX. After reviewing the relevant literature, we XXXX, which proved useful. During this process, we conducted many experiments and consulted many reference materials. I think this way of coping with pressure and difficulties is very important.

在XXX比赛中，模型总是XXXXX。查找资料后，我们XXXX，明显改善了这一问题。在这个过程中，我们做了很多实验，查了很多资料。我觉得这种解决压力和困难的方式很重要

ADD10还有哪些你的重要信息没有体现在简历上？

Regarding open-source contributions, I have shared various competition resources on GitHub that have gained 80 stars, and I was awarded the GitHub Starstruck achievement.

在开源贡献方面，我在GitHub分享过一些竞赛资料，得到了80 Stars，我也因此拿到了GitHub的Starstruck荣誉

ADD11如果可以在简历中增加一段新的经历，你希望是什么

I hope to add a complete research experience. It covers the entire process from posing a question, searching for literature, solving the problem, to publishing a paper. In competitions, we usually make optimizations to problems proposed by others.

我希望能在简历中加上一段真正完整的科研经历，走完提出问题、查找文献、解决问题、发表论文的全过程，而不是像比赛一样针对别人提出的问题做优化

ADD13你从本科经历获得的最宝贵的经验是什么

Failure analysis matters more than success. In competitions, each failed model reveals hidden problems in data or structure. The process of documenting these insights and improving my solutions, is more meaningful than any success.

失败分析比成功更重要。在竞赛中，每一次失败的模型都能揭示隐藏的数据或架构问题。记录这些洞察并优化的过程比任何成功更有意义。

ADD14你在课堂之外主动探索过哪些主题

XXXX. In the competition, I used a dual-branch network. XXXXXXXXXXXXXXX, achieving an accuracy of 0.99. This self-driven exploration deepened my understanding of neural network and ensemble strategies.

ADD15当你发现一个有趣的现象时，你通常会怎么做

When I notice an interesting phenomenon in daily life, I first observe it carefully, then ask "why" and try to relate it to known principles.

当我在生活中发现一个有趣的现象时，我首先会仔细观察，然后问“为什么”，并尝试将其与已知原理联系起来。

ADD16你曾经在没有接受正式指导的情况下自学过什么技能

I self-taught machine learning entirely through online resources, without formal guidance. I started with online courses, then moved to papers and competitions. This path of learning taught me how to validate my ideas and complete tasks.

我完全通过线上资源自学了机器学习，没有接受过正式指导。我从网上的课程开始，然后转向论文和竞赛。这种学习路径教会了我如何验证自己的想法并完成任务。

ADD17你通常从哪里获得新想法或研究灵感

My research inspiration mainly comes from open-source communities and papers. I actively browse projects from GitHub and Kaggle to see how others solve problems. Meanwhile, I follow conferences for novel architectures.

我的研究灵感主要来自开源社区和论文。我会主动浏览GitHub和Kaggle的项目，观察他人如何解决问题。同时，我关注会议上的最新架构。

ADD18举一个没有他人要求，却主动采取行动的例子

Without being asked, I have shared various competition resources on GitHub that have gained 80 stars, and I was awarded the GitHub Starstruck achievement.

在没有他人要求的情况下，我在GitHub分享过一些竞赛资料，得到了80 Stars，我也因此拿到了GitHub的Starstruck荣誉

ADD19目前你对哪个学术问题最感兴趣

I am interested in multimodal models, especially how to bridge gaps between vision, language, and other signals with limited data. I hope to explore this further in graduate research, aiming for robust multimodal systems.

我目前对多模态模型最感兴趣，尤其是如何在有限数据下弥合视觉、语言和其他信号之间的鸿沟。我希望在研究生阶段进一步探索这一方向，构建鲁棒的多模态系统

ADD20介绍一次你在信息有限的情况下作出决定的经历

In the XXXX competition, we had limited on-site data. I decided to XXXX. The results were sent to ROS-based path planning, and we finished all tasks perfectly.

在XXXX竞赛中，我们只有有限的现场数据。我决定XXXX。这个决策效果良好，我们最后满分完成了任务

ADD21你会如何比较同一个问题的不同方案

I compare solutions by defining clear evaluation metrics and running controlled experiments. For each candidate, I measure performance and complexity. I also analyze failure cases. Finally, I choose the most suitable one for the situation.

对每个候选方案衡量性能和复杂度。分析失败案例。最后选择最适合当下情况的方案

ADD22当一个问题没有明确答案时，你会怎么做

I will break it down into small questions and run small experiments. I start with reasonable assumptions, then validate them based on results. I also consult related literature and community discussions.

我会将其分解为可测试的子问题，并进行小规模实验。我从合理的假设出发，然后根据实验结果验证它们。我还会查阅相关文献和社区讨论。

ADD23在时间紧迫的情况下，你会如何作出决定

Under time pressure, I prioritize the most significant factor and make a decision based on my experience. I quickly assess the risk of each option, choose the one with the highest payoff and lowest cost, and leave room for adjustments.

在时间紧迫的情况下，我会优先考虑最关键的因素，并基于经验做出决定。我快速评估每个选项的风险，选择预期收益最高且成本最低的那一个，同时留出调整空间

ADD24在什么情况下，你会决定向他人寻求帮助

I seek help when I have exhausted my debugging and literature review, or when the problem clearly requires knowledge outside my current scope. I believe asking questions is a strength, not a weakness. I always prepare specific questions for efficient cooperation.

当我用尽了调试和调研手段，或者问题明显需要超出我当前范围的知识时，我会寻求帮助。我认为提问是一种优势而非弱点。我总会准备具体的问题，以促进高效协作。

ADD25你会如何判断一个项目是否值得继续

I will evaluate the project by progress, potential impact, and feasibility. If the project has been making no progress, or if the outcome no longer matches the time cost, I will consider it. A project is worth our effort only when it shows value or potential.

我通过进展、潜在影响力和可行性来评估项目。如果项目一直没有进展，或者预期成果与时间成本不匹配，我会考虑这个。一个项目只有展现价值或潜力，才值得继续。

ADD26你是否曾经因为发现新的证据而改变自己的观点

In the XXX Competition, I initially thought XXXX. However, experiments showed that the DWT branch significantly reduced confusion between different versions of Stable Diffusion.

在XXX中，我最初认为XXXXX。然而，实验显示，DWT分支显著减少了稳定扩散模型不同版本之间的混淆。

ADD27你如何判断一个学术资料来源是否可靠

I assess reliability by checking its reputation, citation count, and so on. I prioritize papers from top conferences or journals. For open-source code, I check documentation, community activity, and reproducibility.

我通过考察来源的声誉、引用次数等来判断可靠性。我优先选择顶级会议或期刊的论文。对于开源代码，我会检查文档、社区活跃度和可复现性。

ADD28你会如何比较文献中的不同观点

I compare viewpoints by identifying their core assumptions and experiments, noting where they agree and where they conflict. Finally, I concluded a balanced perspective, acknowledging strengths and weaknesses, which guides my experiments.

我会识别不同观点的核心假设和实验，记录一致之处和分歧所在。我根据可复现性和对我任务的泛化性来评估每个观点。最后，我得到一个平衡的视角，承认各自的优势和局限，从而指导我自己的实验。

ADD29你会如何整理不同论文中的信息

I organize information from papers using Excel or Zotero, with columns for core idea, experiments, key results and so on. I also write summaries in my own words. This helps me identify gaps and contradictory findings across the literature.

我使用电子表格或Zotero，包含核心思想、实验、关键结果等。我还会用自己的话撰写总结。这帮助我识别文献中的空白和矛盾。

ADD30你会如何发现现有文献中的研究空白

I identify research gaps by comparing papers' future work sections and noting unsolved problems they mention. I also look for contradictory findings across studies. Additionally, I think about whether these approaches can be applied to other situations.

我通过比较论文的“未来工作”部分并记录它们提及的未解决问题，来发现研究空白。我还会关注研究间的不一致性。此外，我会考察现有方法是否适用于其他场景

ADD31当你完全无法理解一篇论文，你会怎么做

Firstly, I read its abstract, conclusions, and figures to master the idea. Then I break it down section by section, looking up unfamiliar information. I also search for relevant blogs and online courses. If still stuck, I will discuss with others.

我会先阅读摘要、结论和图表，把握高层思想。然后我逐节分解，查证不熟悉的信息。我还会搜索相关的博客、视频讲座或代码实现来帮助理解。如果仍然卡住，我会与别人讨论。

ADD32你如何把文献中的观点应用到自己的研究中

I adapt literature insights by replicating their core methods on my problems to validate effectiveness. Then I improve backbones, loss functions, and so on, to fit my task. I run experiments to find which parts bring gains.

我将文献观点应用到自己的研究中，首先在我的问题上复现其核心方法，以验证其有效性。然后我修改骨干网络、损失函数等，以适配我的任务。我通过消融实验找出哪些部分带来了提升。

ADD33你认为什么样的学术论证才有说服力

An academic argument must have a clear structure, evidence, and honesty. It should be supported by experiments, proper baselines, and results. It also acknowledges its weaknesses. Finally, it connects findings to broader situations, showing practical significance.

一个有说服力的学术论证必须具备清晰的结构、证据和诚信。它应有实验、适当基线和支持。同时承认其不足。最后，它将发现与更广泛的情况联系起来，展示实际意义。

ADD34你如何筛选与研究主题相关的论文

I start with keyword searches in Google Scholar, then filter by quality and citation count. I prioritize recent papers, and papers whose abstracts closely match my topic.

我首先在谷歌学术进行关键词搜索，然后按会议或期刊质量和引用量筛选。我优先选择近期的论文，以及摘要与我的主题高度匹配的论文。

ADD35你觉得你在这次面试中的表现怎么样

I think my performance is good. I have a good understanding of my projects and can answer various questions. However, I am relatively shy by nature. I will carefully review the shortcomings of this interview and strengthen my knowledge and oral expression.

我觉得我的表现还算不错。我对我的项目了解比较透彻，可以回答出各种问题。但是，我的性格比较腼腆。我会认真复盘本次面试的不足，强化理论知识和口语表达。

ADD36如果这次面试失败，你会怎么做

I will carefully review the shortcomings of this interview and strengthen my knowledge and oral expression. At the same time, I will continue to study relevant projects. If there is an opportunity in the future, I sincerely hope you will consider me as well.

我会认真复盘本次面试的不足，强化理论知识和口语表达。同时我也会继续学习相关项目，如果后面有机会，也希望老师能考虑我

ADD37在你的研究生期间，你希望能实现什么

During my graduate studies, I hope to master commonly used models like CNN and make improvements to them, with the goal of publishing my work at top conferences. To achieve this, I will actively read papers and participate in my supervisor's projects.

在研究生期间，我希望能掌握CNN等常用模型并做出改进，将成果发表在高水平会议上。为此，我会积极阅读前沿论文，参加导师的项目

ADD38你的某门课程为什么得分很低

Sorry, professor. That semester I focused on the China Robot Competition, so I wasn't fully prepared for the course. After that, I analyzed my failures, strengthened my time management, and increased my commitment to professional courses.

不好意思老师，那学期我把主要精力投入了中国机器人大赛，导致对课程内容不够熟悉。事后我总结了失败原因，增加了对专业课程的投入

ADD39你如何应对困难和挑战

I will break down a difficult problem into many smaller tasks and make a plan for them. I will also analyze each failure, actively communicate with my teammates, and learn from the challenges encountered along the way.

我会将一个困难分解为多小任务，并为他们制定计划。我也会分析每一次失败，积极与队友交流，在困难中学习

ADD40谈谈你的学习习惯

In daily life, I preview the material before class, listen carefully during lectures, and review after class while completing all homework. In projects, I start with similar projects and relevant literature. Also I will actively communicate with others.

日常生活中，我做到课前预习，上课认真听讲，课后及时复习并完成作业。在项目中，我会先调研类似项目，研究相关文献，并积极与别人沟通

ADD41你如何管理时间/如何平衡项目、课外活动与学业

Regarding time management, I can balance my academic studies with other projects. I prioritize professional courses, while engaging in competitions and projects during my spare time. I often arrange my schedule according to the importance of each task.

在时间管理上，我尽可能平衡我的学业与其他项目。我把重心放在课程学习上，在空闲时间参加竞赛和项目，根据事情的重要程度安排我的时间

ADD42是否愿意接受调剂

I'm open to reasonable adjustments if they align with my interests. My projects have made me adaptable. However, I would prefer to discuss the arrangements in advance to ensure alignment with my direction, as my passion lies in computer vision and AI.

我愿意接受合理的调剂，如果与我的研究兴趣相关。多元的项目经历让我适应性强。不过，我希望事先讨论具体安排以确保双方契合，因为我的热情在于CV和AI

ADD43你为什么没有发过论文/为什么不参与科研

Influenced by members of the robotics club, I would like to firstly deepen my involvement in competitions to cultivate solid engineering skills. Currently, I am also reading selected literature to enhance my research abilities.

受到社团同学的影响，我优先深耕竞赛，以锻炼扎实的工程能力。现在我也有看一些文献，提高我的科研水平

ADD44你的项目有什么内在联系，对研究生学习有什么启发

My projects focus on computer vision. In these projects, I train models for various problems, enhance their robustness, and solve real-world problems. The projects contribute to my solid engineering skills, and the knowledge can also be applied to my graduate studies.

我的项目集中于计算机视觉。在项目中，我针对不同问题训练模型，增强他们的鲁棒性，解决现实生活中的问题。这些项目增强了我的动手能力，这些知识也可以用到我的研究生学习中

ADD45你为什么选择这个导师

I have previously communicated with my advisor online. I admire his work in computer vision and multimodal learning, which aligns with my projects. I am looking forward to receiving his guidance and enhancing my research abilities as much as possible.

我之前与这个导师线上交流过。我很钦佩他在计算机视觉与多模态方面的工作，这与我的项目比较匹配。我很期待能接受他的指导，提高我的科研水平

ADD46你平常是怎么阅读文献的

I will begin by reading the title, abstract, and conclusion of a paper, to determine whether it's relevant to my needs. Next, I will review the introduction and figures to master the ideas. Finally, I will read the experiments and results. I'll write a summary for future review.

我会先看论文的标题，摘要和结论，判断是否是我需要的论文。接着看介绍和图表，理解这个研究。最后读他的实验方法和结果。我会对论文做好总结，方便日后复习

ADD47你平常读哪些高水平期刊上的文章

I have been reading papers from top conferences in the field of computer vision, such as CVPR and ICCV. These conferences have exposed me to many emerging research directions, which can provide valuable inspiration for my projects.

我有看一些计算机视觉顶会的文章，比如CVPR，ICCV。这些会议让我了解到一些前沿方向，可以给我的项目带来启发

ADD48你读过的一篇文献

I have read the ResNet paper, which was the Best Paper awardee at CVPR that year. The core contribution of that work is residual learning. By introducing "shortcut" connections, it addresses the degradation problem, enabling the construction of deep neural networks.

我之前读过ResNet的论文，是当年CVPR的最佳论文。那篇论文的核心在于残差学习。它通过“shortcut”解决了退化问题，使超深网络成为可能。

ADD49你能简单介绍一下你的专业吗（自动化）

The core of the Automation major is control theory, which includes fields such as robotics and AI. Our courses not only cover traditional control theory but also include machine learning. So our research directions involve computer vision, autonomous driving and so on.

自动化专业的核心在于控制。这涉及机器人、人工智能等领域。我们不仅要学控制理论，还要学机器学习。因此，我们的研究方向包括计算机视觉、自动驾驶等多个方面

ADD50你如何处理学术上的失败

I recognize failure as a form of experience. I think about the causes of each failure to avoid the same mistakes. In addition, I will remain calm, look for relevant resources, and actively communicate with others. I will work hard to solve the problems at hand.

我把失败视为一种经验。我会从失败中总结原因，避免同样的错误。另外，我会保持冷静，查找资料，积极与别人交流，努力解决问题

ADD51你通常在团队中扮演什么角色/如何看待团队合作

Teamwork is significant. In projects, I often serve as a core member, focusing on technical challenges in areas like computer vision. Our teams often consist of members with different skills. I believe that respect, communication and cooperation are drivers of breakthroughs.

团队合作很重要。在项目中，我通常是团队的核心成员，聚焦与计算机视觉等技术问题。团队中往往有熟悉不同技能的同学。尊重、沟通和协同可以带来突破

ADD52如果你是队长，你会做什么

As the leader, I will present to the team members with a positive and optimistic attitude to keep the team united. Secondly, I will consider each person's strengths and allocate their work reasonably. Finally, I will hold regular meetings to exchange ideas.

ADD53你怎么处理与队友的矛盾

Teamwork is significant. I believe that respect, communication and collaboration are drivers of breakthroughs. When I have a conflict with my teammates, I usually force myself to stay calm and try to communicate with my teammates in a peaceful manner.

ADD54你的家人是否支持你读研/读博

I'm willing to further my education, and my parents always show respect for my interests. Currently, there is a growing demand for computer vision and intelligent robots, and I'm optimistic about the future of automation. Through my projects, I have gained knowledge in computer vision. However, my research abilities still need improvement, and I sometimes feel confused when faced with complex problems. Therefore, I hope to further my education, and also that's why my family supports me.

ADD55谈一谈英语的作用

English is important for us. When we read some English literature, always going through the translation software is troublesome, and the translation of professional words may be inaccurate. In addition, we always need to communicate with others in English at international conferences.

ADD56你最喜欢的食物

My favorite food is roast duck rice. It's very delicious, and I often eat it. It contains duck meat, vegetables, and a sweet and sour sauce. It is not only healthy but also affordable. Many restaurants around my school serve this dish, and many students like it.

我最喜欢的食物是烧鸭饭。烧鸭饭非常好吃，我经常吃。里面有鸭肉、蔬菜和酸酸甜甜的酱汁，不仅健康而且价格亲民。我们学校周围的很多饭店里面都有这道菜，很多学生都喜欢

ADD57你还有什么想问我们的吗

Professor, if I am fortunate enough to be admitted, what areas do you think I still need to strengthen?

老师，如果我能有幸被录取，您认为我还需要加强哪些方面
